Canadian Trade Mark No. TMA 453 019

HIWA-LITE™ Retro-reflective elastics is an exposed micro lens system with raised profile to enhance wide light entrance angle retro-reflective effect. It is specifically designed for high visibility in day and night. When tested to ASTM E810-91 specification at 0.2° observation angle and -4° entrance angle, the co-efficient of retro-reflection is 600 candlepower per incident footcandle per square foot. It still maintains 400 candlepower per incident footcandle per square foot when elongation is 40% over its original length. The above information is for reference only, sellers and manufacturer's only liability will replace such quantity of the product proved to be defective. User shall determine the suitability of the product for his intended use, and user assumes all risk and liability whatsoever in connection therewith.

Product qualifies for NAFTA duty treatment for export to USA and Mexico

KAN HOUSE OF KAGROO INC.

Made in Canada Manufacturer #CA26805
